

HEATH LODGE CLINIC

A PERSONAL AND INDEPENDENT APPROACH TO CLINICAL SERVICES

DEXA Scanning for Osteoporosis:

- *A DEXA scan takes 15 minutes to complete which measures bone density and body fat composition for adults of all ages.*
- *Detects Osteoporosis, which affects 50% of women and 20% of men leading to osteoporotic fractures.*
- *No symptoms or warning of osteoporosis until a fracture occurs*
- *A DEXA scan is the gold standard to help diagnose osteoporosis, enabling the individual to seek early treatment.*

Specialising in MRI Scanning and Diagnostic Services

- MRI Scanning • DEXA Scanning • Ultrasound • X-RAY • Pain Management Facilities

Where to find us...

Based just 300 meters from junction 5 of the M42 in Solihull, easily accessible from all major motorway networks, we currently treat patients nationwide.

Although we are approved by the major insurance companies, we specialise in providing competitive rates for self-funding patients.
